

LizardFS

Day: 02

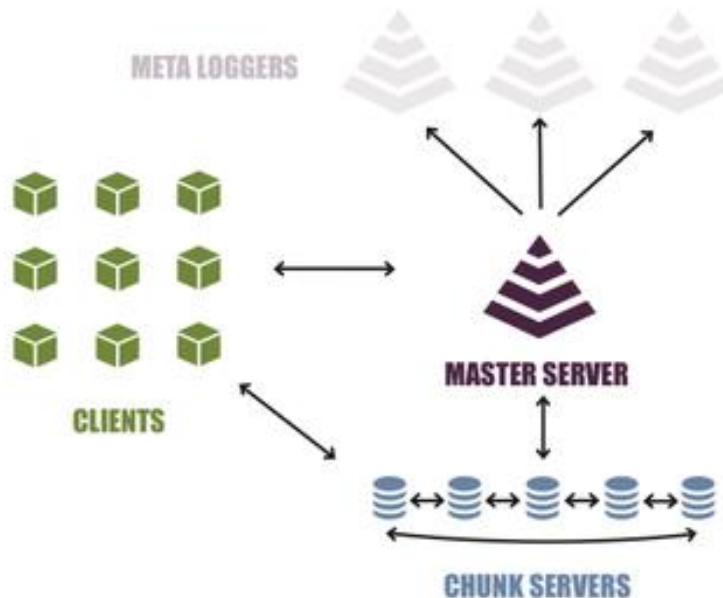

LizardFS

Standard hardware plus LizardFS equals a resilient, flexible, and configurable POSIX-compliant storage pool

LizardFS Components

Communication between modules

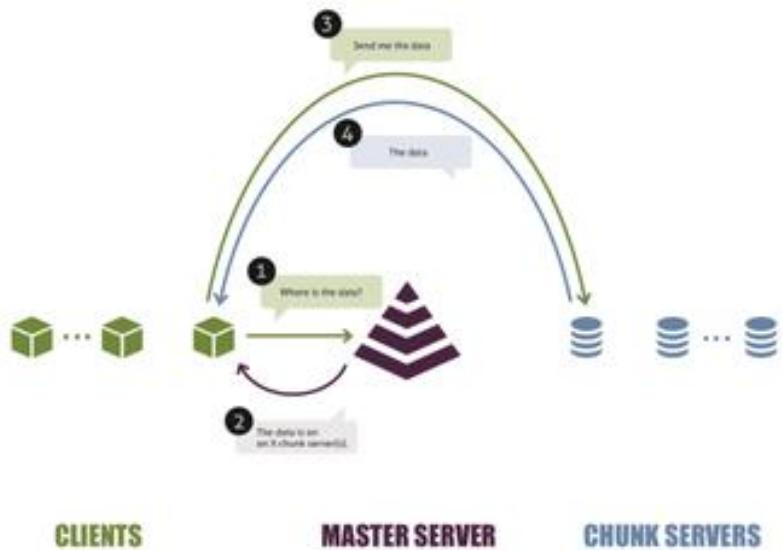

LizardFS Server

- Master
- Shadow Master
- Chunk Server

LizardFS Clients

LizardFS Read Process

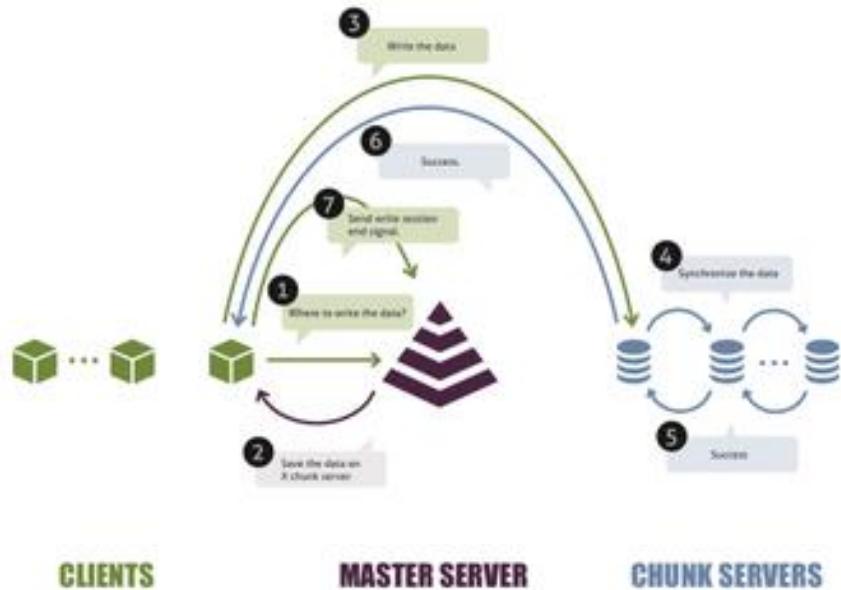

LizardFS Read process

A user or an application accesses a file in the storage pool, the LizardFS client contacts the current master, which has a list of the current chunk servers and the data hosted there

LizardFS Write Process

LizardFS Write process

mfsmaster.cfg

Master

PERSONALITY = master

WORKING_USER = mfs
